Saymon Rivas

Computer Science Graduate · Software Engineering · Web Applications & APIs · UCF

slrivas24@gmail.com · 321-946-6935 · LinkedIn: linkedin.com/in/saymonrivas · Location: Orlando, FL

PROFESSIONAL SUMMARY

Computer Science graduate (UCF) with hands-on experience across the software development lifecycle building and maintaining React web applications, REST APIs, and database-backed features. Strong object-oriented programming foundation with experience in goal analysis, UI design, testing, debugging, deployment, and technical documentation. Fully bilingual in Spanish and English.

TECHNICAL SKILLS

Programming	JavaScript, TypeScript, Python, Java, C, SQL, HTML, CSS
Frameworks	React, Node.js, Express, Next.js, Vite
Databases	MySQL, MongoDB, Mongoose, PostgreSQL
Engineering	OOP, REST APIs, Git, Jira, testing/debugging, technical documentation, CI/CD
Infrastructure	DigitalOcean, Nginx, PM2
Languages	English (native) · Spanish (native)

WORK EXPERIENCE

Data Annotation — AI Quality Assurance Analyst *Jan 2025 – Present · Remote*

- Evaluate 100+ LLM outputs per week using structured rubrics for accuracy, relevance, and instruction compliance while maintaining quality standards in high-volume queues.
- Create and review conversational datasets, identify recurring output defects, and document findings for downstream model-improvement workflows.
- Document systematic errors and provide structured, reproducible feedback that strengthens QA review cycles and supports consistent evaluation decisions.

Outlier — Technical Reviewer, AI Code Evaluation *Oct 2024 – Jan 2025 · Remote*

- Reviewed AI-generated JavaScript for functional and logical errors, edge cases, and instruction adherence across high-volume evaluation queues.
- Cross-validated contributor submissions in multi-reviewer QA workflows and documented technical reasoning against project standards.
- Delivered structured, actionable feedback to improve code quality and support iterative model-evaluation cycles.

RaceTrac — Associate (Part-Time) *Aug 2022 – Present · Orlando, FL*

- Manage POS operations, inventory, and store facilities while maintaining zero compliance incidents across 3+ years of part-time tenure.
- Balance independent responsibilities and team coordination in a fast-paced customer-service environment.

FEATURED PROJECTS

AJ Multiservices — Production Business Website | *React · JavaScript · HTML/CSS · DigitalOcean · Git · ajmultiservicesllc.com*

- Led the full SDLC for a customer-facing business website, from client requirements and responsive UI design through testing, deployment, and ongoing maintenance.
- Configured DigitalOcean, Nginx, PM2, domain routing, and Git-based deployments to support stable production operation and iterative releases.

Language-Learning Chatbot Web App (Talking With Tito) | *React · JavaScript · MySQL · REST API · llama.cpp · Jira*

- Contributed across the SDLC for an LLM-powered language-learning application, maintaining and refining the existing codebase while developing and debugging integrations across the React frontend, backend API, and MySQL layers.
- Researched and implemented a smaller local LLM through llama.cpp, improving multilingual instruction adherence, optimizing resource usage, and increasing context capacity from 2,048 to 4,096 tokens.
- Authored technical documentation covering API calls, backend solutions, data structures, system interactions, and component workflows to support development and handoff.

EDUCATION

2022 – 2026 **B.S. Computer Science · GPA: 3.35 · Graduated Aug 2026 · University of Central Florida, Orlando, FL**
Relevant coursework: Machine Learning, AI, Cybersecurity, Database Systems, Algorithms, System Administration, OOP, POOSD, Senior Design.

2025 **Google Data Analytics Professional Certificate**
